**Attachments:** Special Provisions-Contact List.pdf

Hi Harvey,

Our utilities person was listed on the attached document as the point of contact - 2nd line, Navy; 400 Marshall Road Pearl Harbor, HI 96860-3139; Petroleum; Fuel/Water; James Ebisu (NAVFAC Hawaii); 808 474-3726; james.ebisu@navy.mil

James and team have already forwarded all utility drawings to Ms. Hazel Andrews of RM Towill back in the late 2008/early 2009. Can the contractor contact Ms. Andrews?

Thank you!

Lynn

Subject: Contractor's inquiry to the Navy

Because of restrictions in the Hawaii Administrative Rules regarding procurement we are unable to confirm the identification of any individual contractors until after contract award, but I can let you know that the first construction project for the Honolulu High-Capacity Transit Corridor Project (HHCTCP) extends from East Kapolei, near the planned Kroc Center to Ala Moana Center via the Airport. Presently there are three active HHCTCP solicitations in process. One is for the West Oahu/Farrington Highway Fixed Guideway Contract, another is the Core Systems Contract that covers the entire length and another is for a Maintenance and Storage Facility. Multiple contractors either are or will be in competition for these contracts, but none are under contract at this time. The first construction contract is expected to be awarded in the fall of 2009.

Information provided in the Request for Proposals is sufficient for the contractors to prepare their proposals. We do not make any indication in any of the three proposals for the offerors to contact any military agency or utility company. You are free to provide them information; however, I suggest that you just refer them back to the City and County of Honolulu Procurement office if they have any specific questions or request for information.

I appreciate the cooperation and exchange of information provided by the Navy to the City and County Rapid Transit Division staff during the environmental impact statement development and plan preparation for the rail transit project.

Harvey L. Berliner, PE
